

# Step up to convenient retrieval.

The KODAK IMAGELINK Retrieval Workstation 1000 offers fast, reliable retrieval for departments and work areas that need to access and print document images stored on 16 mm microfilm (or microfiche, with optional adapter). The Workstation 1000 is easy to use and includes many time- and step-saving features to help people work productively. A great value, it provides border removal and automatic exposure as standard features, at a very competitive price.

## Accomplish more without working harder.

The Workstation 1000 enables experienced and casual operators alike to work efficiently. Auto threading and high-speed film transport get them to the documents quickly. Motorized A-B channel scan speeds selection. A touch of the print key, and copies are on their way. At the touch of another key, the Workstation 1000 will automatically refile and release the film cartridge. All this speed gives people more time to spend on other work.

## Advanced capabilities at your fingertips.

One of the reasons the Workstation 1000 is so efficient is its film controller. It's fast, flexible, and smart. It accommodates most standard 16 mm magazines and cartridges. The odometer is programmable and very accurate. And the Workstation 1000 is designed to provide an upgrade path to automated image mark searching in the future. So your investment today

gives you a platform that can move you to the benefits of computer-aided retrieval (CAR) as your system grows.

## Print quality — plain and simple.

Document prints made by the Workstation 1000 are sharp and clean. Manual border removal saves toner and makes prints look more like originals. An autorotate feature adjusts the orientation of the image for printing landscape-oriented images. A choice of interchangeable zoom lenses size your image to fit the page. Automatic exposure control delivers consistent printing results without stopping to make adjustments.

To get operators through retrievals quickly, the Workstation 1000 prints up to ten pages per minute. A generous 250-sheet paper supply minimizes interruptions. Toner cartridges are clean and convenient. In fact, changing from negative-to-positive print mode to positive-to-positive is easily done by sliding one cartridge out and sliding another in.

## A productive, ergonomic work environment.

The controls of the Workstation 1000 are designed to minimize error. For example, the refile key is located away from other controls to prevent confusion and accidental refiles. And the manual control knob is positioned to help relieve stress on operators' wrists. Helpful user messages appear in the odometer display to guide operators, reducing the need for training or interruptions to refer to a user manual. An optional work surface that integrates with the Workstation 1000 provides plenty of room for paperwork, and even includes a recessed area for fasteners or office supplies. An additional storage module turns the Workstation 1000 into a complete, free-standing retrieval center.

**Take your retrievals to a new level of efficiency and quality. Contact your authorized Kodak representative and find out how affordable the productivity of the KODAK IMAGELINK Retrieval Workstation 1000 can be.**

# KODAK IMAGELINK Retrieval Workstation 1000

## Features

- accepts silver, diazo, and vesicular 16 mm roll film, 2.5 to 6.0 mil
- operates with KODAK EKTAMATE Magazines, ANSI- and M-type cartridges
- auto threading and high-speed transport
- refill key with auto release
- programmable LED odometer
- ergonomic controls
- motorized A-B channel scan
- three manual zoom lenses: 9.5 to 16X, 16 to 32X, and 30 to 55X
- plain-paper prints
- approximately 10 prints per minute

- clean, convenient toner cartridge
- 250-sheet paper supply capacity
- manual border removal
- auto-rotate for printing landscape format
- automatic exposure control
- neg-to-pos and pos-to-pos printing capability
- upgrade path to automated image mark searching
- auto lamp off when film is refilled

## Accessories

Operational work surface  
Work surface extension  
105 mm microfiche carrier

## Specifications

### Dimensions:

Height: 51.75" in. (132 cm)

Width: 20.83" in. (53 cm)

Depth: 29.13" in. (74 cm)

Weight: 130 lb. (59 kg)

Screen size: 11.75" x 11.75"  
(30 cm x 30 cm)

### Electrical requirements:

Voltage: 104 to 127 V AC, 60 Hz

Power: 1200 W max

Current: 13 Amps max

### Noise levels:

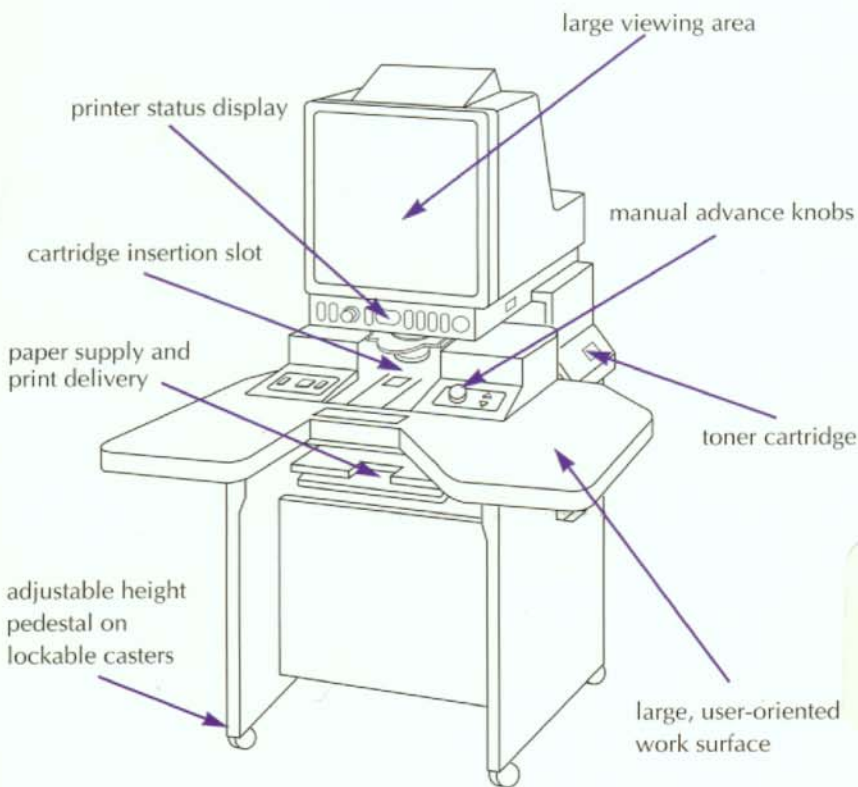

Standby: <40 dBA

Transport: <60 dBA

Impulse: <75 dBA

### Heat dissipation:

750 Btu/hour
